PERSONAL PROJECTS

Heart_Disease_Prediction Flask-Web-App

- In this web app, I train a model using SVM Machine Learning. Then this model is deploy using **Flask**.

Sticky Notes Web App

- This web app saves all your records in the database with a log-in system session handling all CRUD systems. Using **HTML/CSS NodeJs/Express MongoDB/Atlas**.

Lahore Garrison University Student Portal

- This Portal helps students to view there all their records, including New Enrollments, Challan Forms, attendance, and Student Results. **More than 8K students currently using this.**

React-Full-Calendar-with-Events

- Create a simple Calendar Application that shows the Country Holidays. You will use a Calendar library that will help you with your UI design for showing the Calendar view. The Holidays for a specific Country can be fetched by making an API call and the response received can be mapped to your Calendar library bypassing the data in the appropriate
